

*America's most affordable
full frame computer quilting systems*

Introducing the
Quilting Master IV

The Quilting Master IV Is the most modern quilting system to date. It has been updated to full 4 axis servo controls, which increases the top quilting speed, reduces noise and vibration even further with only a minor price increase . It is the smallest possible footprint for a full frame quilting system. Introduced in January of 2014 this model is our top of the line system for the professional quilting studio.

Supplies will be limited on this new model, place your order today. !

The Quilting Master IV offers these Premium Features:

1. The Quilting Masters perfect design makes the stitches trace look symmetrical and beautiful.
2. All patterns and working program can be stored and transfered via a USB drive for unlimited storage. You may create or edit your designs with all standard Embroidery Design Systems.
3. The Operator has can set the quilting direction, speed, stitch length, design orientation, thread sensor, placement of the designs, and so much more.
4. The stitched path is shown on the screen in different color from the rest while the quilting is being completed.
5. If the thread breaks, the head will automatically go to the rethread position by the left side of the machine. After rethread, the quilting head can be backed up to where the thread broke and mend the missing stitches along original path, then start quilting once again.
6. When quilting is completed, the Quilting Master returns to the start position. The quilt frame can be changed in less than 60 seconds, being ready to start quilting your next quilt.
7. A full testing and diagnostic screen is available to troubleshoot any potential issues.
8. All parts and support are USA based for your quick service needs when required.
